## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election with traverse of Group I, claims 1-8 in Paper No. 5 is acknowledged. The traversal is on the ground(s) that the examiner has not rejected claim 11 as being anticipated or obvious and the issue of obviousness or anticipation is not yet decided. Applicant also argued that the issue of unit of invention was not questioned during the international stage of prosecution. This is not found persuasive because a written restriction requirement in a 371 national stage case, citing lack of unity, need not include a rejection of the claims in order to be valid. Also, lack of unity of invention can be raised at anytime during prosecution, including the national stage of prosecution. The Examiner is not precluded from citing a lack of unity, simply because it was not cited in the international stage of prosecution.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 9-11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected inventions, there being no allowable generic or linking claim.

### ***Claim Rejections - 35 USC § 102/103***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1713

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-8 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, 35 U.S.C. 103(a) as being unpatentable over Robinson et al. (4,339,371) or Nagasuna et al. (USPN 4,973,632).

6. Claims 1-8 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, 35 U.S.C. 103(a) as being unpatentable over Collette et al. (USPN 5,994,419) or Kitagawa (USPN 6,048,908)

Each of Robinson et al., Nagasuna et al., Collette et al. or Kitagawa teach the claimed process comprising polymerizing hydrophilic monomer in an aqueous phase with an initiator in a water in oil emulsion, wherein the emulsions are applied to substrate, allowed to dry/cure with heat.

While Robinson et al., Nagasuna et al., Collette et al. or Kitagawa may not explicitly recite the "high internal phase" of the emulsions, it is reasonable that the

Art Unit: 1713

emulsions of Robinson et al., Nagasuna et al., Collette et al. or Kitagawa would process the presently claimed properties since the process of Robinson et al., Nagasuna et al., Collette et al. or Kitagawa are essentially the same as the claimed process and the USPTO does not have at its disposal the tools or facilities deemed necessary to make physical determinations of the sort. In any event, an otherwise old process is not patentable regardless of any new or unexpected properties of the product. In re Fitzgerald et al , 619 F.2d 67, 205 USPQ 594 (CCPA 1980). See MPEP § 2112 - § 2112.02.

Even if assuming that the prior art references do not meet the requirements of 35 U.S.C. 102, it would still have been obvious to one of ordinary skill in the art, at the time the invention was made, to arrive at the same inventive process because the disclosure of the inventive subject matter appears within the generic disclosure of the prior art.
